About Me

Hi, I'm Habibur Rahman. I am continuously learning web development, especially with the MERN stack. I thoroughly enjoy coding until I encounter any bugs, and afterward, I resolve them. Currently, I am seeking a junior front-end or junior web development opportunity to further my growth and learning within a company. Yeah, that's a brief programming-related introduction about me. Thank you for reading carefully.

Projects

RESTRO BOSS
Mern Project

I have made this project using Express, MongoDB, JsonWebToken,and ReactJS. It's a restaurant food ordering app. Have an admin dashboard and customer dashboard as well. For Authentication used firebase.and also used react query for fetching data.

CAR DOCTOR
Mern Project

It's a Car Repairing website. I have made this project using React, MongoDB, and ReactJS. It's have a about page. A service page that show all services. And have a booking page for booking. And have a Contact page for contact.(Static)

Education

2023

I recently completed a front-end development course offered by a local tech company, and it was incredibly informative. I gained a lot of valuable knowledge and skills from the course

2019

Finish My High Scholl

Scholl Name

Barlin High school and College
